**Subject:** Updated NCPDP 5.1 layout

Attached is the updated NCPDP 5.1 layout for BHS and CRS (and anyone else who may want to send in the 5.1 format).

It contains the corrections to the Encounter Requirement column, a new example showing dispensing fee, and an added note in the Other Payer ID field:

If the other payer is Medicare, the Other Payer ID Must be "MEDICARE".

The changes are noted in the Change Management worksheet and where changed the rows or cell is highlighted in green.
